## My First Teaching Intuition

What is one of your favorite moments in the classroom?

When are you pleased most with your teaching? Name something specific that you did that made you so pleased.

Think of a teacher you admire. Can you describe why? Is it something they do or a way they act?

Did an idea that changed your whole lesson ever come to you spontaneously?

Would you say that you are an intuitive teacher?

Do you try to train yourself to replicate your favorite teaching moments? How?

What do you value most about your abilities to teach?

If you could enhance one part of your teaching, what would it be?

How do you wish to grow as a person? What do you wish could be the next version of yourself?
