

Sympathetic Vibration

Guiding Objectives: 1. If everything is made of waves of: gravity, matter, electromagnetism, quantum field, fire, music, and light, then ... 2. So are we. 3. And, if we have free choice, then ... 4. Therefore, we can vibrate in sympathy with anything we wish to. We can be in harmony with all.

Gravity Waves ... Moon

Matter Waves ... Clocks

EM Waves ... Sun

Quantum Waves ... You and Someone you Love

Fire Waves ... Lightning

Sound Waves ... Music

Light Waves ... Starlight

- * **Candle Orb:** Observation
- * **Remember that ... Epi-EM / Quantum Field:** is outside space and time, it is where the real circle, line, triangle, square exist, it is also where one can be totally with another and achieve **Sympathetic Vibration**
- * **Sympathetic Gravity Waves:** Moon affecting tides, sap in trees, human fluids / moods
- * **Sympathetic Matter Waves:** Pendulum Clocks, **Tuning Forks**
- * **Sympathetic EM Waves:** Sun flares affecting human affairs, sensing a person's 'vibe', heart thought / heart magnetic field
- * **Human Heart is Sympathetic to Sun** as seen in these calculations:
 - * Plato said that humankind changes consciousness every 2,160 years. This is the time it takes the ecliptic to move through one sign of the Zodiac and is now called a Platonic month. Therefore, one 360 degree rotation of the ecliptic takes 72 years. Therefore, a Platonic year is 25,920 years.
 - * Some ancients believed that a harmonious person would live 72 years and would have 72 heartbeats per minute. It was said that the heart was like a pendulum that swung back and forth to make 1 cycle. This cycle occurs with each breath, which is once per 4 heartbeats. Therefore, a harmonious person has 25,920 breaths in one day?
- * **Sympathetic Quantum Waves:** outside of / inside of EM field, mother writing about son in diary at exact time of something happening to son, what if you could go outside of space and time and touch two places at the same time or whisper to two people at the same time ... could there be beings living in the Quantum / Epi-EM Field working with us? ... can we?
- * **Sympathetic Sound Waves:** tuning forks, guitars, violins, a **Hand Clap**, a clap of thunder as lightning rips air apart and creates a shock wave that moves faster than the speed of sound
 - * **Air Gun** to show pulse of air.
 - * **Copper rods** rubbed with violin string resin to produce sound waves.
- * **Sympathetic Fire Waves** being Moved by Magnetic Field
- * **Sympathetic Light Waves as Lightning:** as extreme example of friction and static, from rubbing electrons from cloud movement, recent theories are that ice crystals in the clouds do the electron ripping. Lightning Facts: up to 10e9 volts voltage, 10e5 amps current, 10e10 watts power, 54,000 degrees F. This is hotter than the surface of the Sun, which is 10,000 degrees F; but the interior of the Sun is about 27,000,000 degrees F.
- * **Robot Balloon:** helium, else it works pretty well with regular balloon – as a model of human being attracted to another's field

It's all a matter of vibration, so let's perform an exercise in the quantum field, where we envision the vibration of a tree.

- * **Exercise of Envisioning Lightning:** go to Epi / Quantum Field, outside of space and time and imagine a tree growing at increasing speeds or vibrations

Quickening

fire and lightning
may appear
separate from
plants growing here

but see the branch and flower spread
to full grown height from a single seed
then quicken the vision inside your head
till the scenery reaches terminal speed

trees and bush
grass and stem
are simply fire
slowed down, then
